

## Checklist for Mathematics Major

- Students interested in the mathematics major should follow your math placement, and take Calculus I as early as possible, because it is part of the major required sequence MAT 117/131H, 118/132H, 231, 232.
- Students considering a major in mathematics are encouraged to take MAT 131H/132H rather than MAT 117/118 in their first year.
- Each mathematics major must pass a comprehensive examination administered at the end of the fall or the spring semester of the senior year. The exam is based on 8 topics covered in the required mathematics courses. Frequently included topics are Theory of Differentiation; Differentiation Techniques; Theory of Integration; Integration Techniques; Sequences and Series; Discrete Mathematics; Linear Algebra; and topics from the Mathematics Seminar.
