Password Project Update

Please register with our password management system now. It will help you as passwords expire.

Many of you have expressed concerns about the 90 day expiration timeframe. We have listened.

We are planning the following expiration schedule for the next year that will ease our transition to a 90 day expiration.

1. We will begin password resets after Easter Break through the beginning of May – department by department (we will contact you about your specific day after Easter).
2. Starting in mid-September, passwords will expire and people will have to reset passwords again.
3. In mid-January, passwords will expire and will continue on a 90 day expiration.
