

How to Clear the Cache in Google Chrome

Open Chrome and click on the three lines under the X on the upper right hand corner.

Select Settings

Scroll to the bottom of the settings screen and click on the link that says show advanced settings.

Under the Content heading are two buttons one for Content settings and the other to Clear the browsing data press the button to Clear browsing data

Make sure the setting is for the beginning of time and you have check boxes in Browsing history, Download history, Cookies and other site and plugin data, Cached images and files. (Passwords is optional but recommended.) Press the clear browsing data now button and wait a minute or two. Now close your browser and re-start it, your cache is cleared.
